# BROVOLOG —

is an expert in careful eyebrow restoration. Their technique is changing the direction of how the hairs grow. A brovolog uses only tweezers. No chemicals, oils, styling, serums or hormones. As a result of such work eyebrows do not get "washed off" and are easy to care for.

# BROVOLOGY —

is a teaching based on Natalia Abramova's years of experience in working with troubled eyebrows. It includes a copyrighted technique of changing hairs growth direction with tweezers. It is distinguished by its systematic approach to eyebrow restoration.

### **3-4 VISITS TO A BROVOLOG.**

Not yet fully completed recovery process. There are no longer "stumps" that bothered the client for several years and required everyday care.

---

### **1 VISIT.**

"Smart Correction" technique. Full hour of working on eyebrow transformation without laminating, chemical styling or fixing gels.

---

### **3 VISITS.**

After working with a Brovolog the client no longer needs daily use of tweezers and removing the "stumps". The eyebrow has become uniform and manageable.

---

#### **4 VISITS.**

Refused trimming and regrew a "tail" on each eyebrow. Eyebrows have become light and manageable. The client does not need frequent visits to a Brovolog, just once every 2 months to maintain the result.

---

### **3 VISITS.**

Here is a traditional error of youth - thin eyebrows. The technique of changing the hairs growth direction made it possible to show eyebrow width that can be achieved.

---

**4-5 VISITS DURING A YEAR AND HERE IS THE RESULT!**

Natural eyebrows with the changed hair growth direction, restoration of the eyebrow fullness.

---

## 5 VISITS.

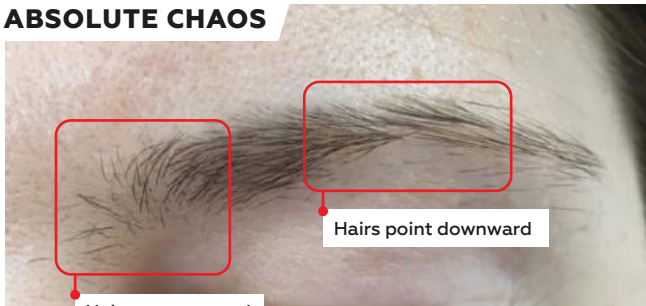

The result: obedient eyebrows that have not been "washed off" even after a few months.

## ABSOLUTE CHAOS

Hairs grow toward  
the nose and the  
other eyebrow

Hairs point downward

Changed hairs direction  
and shaped the eyebrows

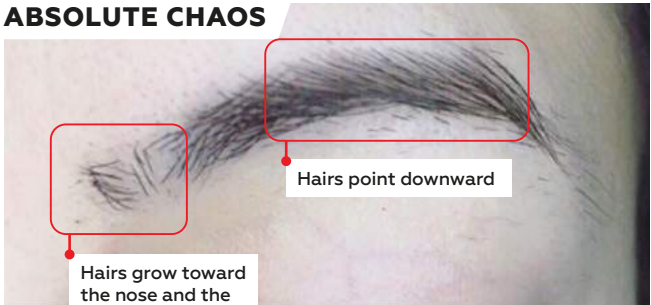

Hairs are pointed in  
the right direction

## Notice what the direction of the hairs is

It is possible to grow heavily-tweezed eyebrows back. However, only a brovolog can make eyebrows manageable and growing in the right direction.

Changing hair growth direction saves clients time and money.

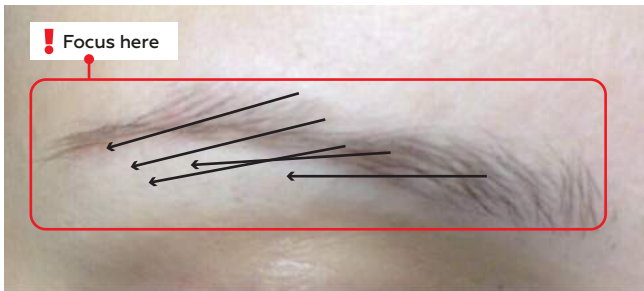

There's no need of laminating which can cause damage to the skin, the hair and can even cause hair loss.

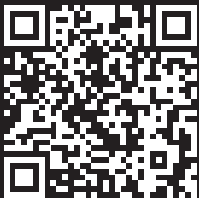

Vellus hair falls out completely in most cases even if the exposure time is observed.
